What's New in the Photoshop 2021 (Version 22.4)?

The Gradient Tool enables you to create smoothly blending gradients. A gradient blends two or more colors together, using solid colors as the end points. The Gradient Tool can produce pleasing blends, even when you make small changes to the gradient. You can create your own textures and make them vary from one image to another. To create a new texture, select an image, then use the Texture Brush and a set of existing text or pattern brushes to create your own texture. If you need to alter the look of a group of pixels, you can use the Spot Healing Brush, which allows you to select pixels and make adjustments on a pixel-by-pixel basis. You can adjust the brush size, opacity, healing and repair settings, and blend modes. Photos, words, and shapes can be combined together as you create masks. A mask works like an outline and allows you to isolate an area of an image and make it transparent.

The Mask Tool enables you to draw or select simple shapes and then modify them with mask-type effects. You can create special lines in an image that curve smoothly. The Pen Tool is just one of the tools that enables you to create lines in your images. Click on the Pen Tool icon at the top left of the tools bar to select the Pen Tool. Then, use the mouse to drag across the image and create curved lines. There are other tools you can use to perform specialized tasks, including Liquify, which enables you to stretch, squish, and warp your images; the 3D Warp Tool, which lets you stretch or warp an image in one or more dimensions; and the 3D Rotation Tool, which lets you rotate an image around any point on the x-, y-, or z-axis. Photoshop comes with a number of text options, including the Text Tool, which lets you draw, copy, or paste text into the image. You can also use the Type Tool to modify text, or the Paint Bucket to fill text. If you often create or edit images with only one color in mind, you might want to consider applying a color overlay. The Color Overlay lets you add or subtract one color from an image. In the Layers panel, you can find the Color Overlay icon in the Channels group. Click the icon to select it, then click on your image in the Layers panel. From the Color Overlay menu, you can choose to add
