Q: How to get the most recent logins from a SQL Server database for a given day I have a requirement to get the most recent logins for a given day from a SQL Server database. I'm thinking of writing a stored procedure or function which will take the date as an input parameter and return the result. I'm not sure how to go about writing the query though. Here's an example of what I have so far. DECLARE @date DATE SELECT @date = '2017-03-15' SELECT TOP 1 Username FROM LoginLog WHERE [LoginDate] = @date ORDER BY [LoginDate] DESC A: You can simply use ORDER BY clause in the select statement: DECLARE @date DATE = '2017-03-15' SELECT * FROM (SELECT LoginDate, UserName FROM LoginLog ORDER BY LoginDate DESC) as T1 WHERE T1.LoginDate = @date Or you can use an aggregate function with MAX() DECLARE @date DATE = '2017-03-15' SELECT * FROM (SELECT
