Zimbabwe funeral burned by Catholics after atheist relatives set out fire by AFP Shona, 40-Jul-2015:: Organisations of various denominations, including Catholics and the Methodist Church, protested against the death of Zimbabwean man killed by followers of a traditional leader who was being buried, while his atheist relatives set fire to the cortege to mourn the man's passing. The funeral on Wednesday morning of Lancaster Mutairi, who died last year following a botched circumcision ceremony allegedly prompted by a religious initiation passed on to him by elders in his community, was marred by the fire at the ustaz, or religious instructor, Thomas Mputwawa. Chants of "the constable is dead" could be heard in the crowd as two security officers tried to block entry of the fire from another part of the house, the Zimbabwe Standard reported. Mutairi was brought into the house by the mother of the family, claiming he had AIDS. The sinews of his neck were later cut off following a complaint that he had contracted the deadly disease. Meanwhile, 300 protesters marched to a local town council office on Tuesday to demand the arrest of the ustaz, who they said had performed the circumcision ceremony using a wood tube. "We want justice for him. The ustaz cut his neck using a glass tube and supposedly Mutairi died at the same place," protester, Isaiah Salim, told AFP. "His death, indeed that of the people who participated in this ceremony, has been prevented from being investigated by the police." The government declined to intervene. The incident happened after a young man had enrolled at the ustaz' house in a nearby village to learn the traditional initiation, and in the course of a circumcision ceremony Mutairi was sodomised with a wood pipe, the

Recently the MMORPG trade has been on a downer. While the hype of the blockbuster titles of 2010 are dying out, new titles have begun to appear on the market that actually cater to the MMO gamer's taste. A

group of games that stand out from the game medium in almost all aspects are the fantasy games. Despite the genre not having done well for the past few years, there are now promising titles that set to change that. One of the better and most innovative titles that has come from the genre is RPG MO. "RPG MO" has been available to play online for quite some time now, but the publisher recently decided to release a stand alone expansion for the game that will help people test it out. Now, with the release of the expansion out, I will be reviewing and summarizing what this game has to offer both to the serious and casual RPG gamers. The game itself has changed very little since its release so I'll cover that first and go over the basic mechanics for players to get a sense of how it works. "RPG MO" is a browser based MMO that casts players in an

What's new in Vacuum:

demo is coming from the studio behind some of the most accomplished games on Oculus Home, including the Half-Life franchise, Stanley Parable, and the much-loved Lone Echo. This slick mixed-reality shooter will take full advantage of the TALOS AI while delivering an experience designed for both indoor and outdoor use, and in 'Interplanetary Coalition' style, you'll be taking control of one of the three player characters available. So far, their work has had the feel of each title being a spin-off of Half-Life with a futuristic, scifi spin, but combined with an all-powerful AI. We've seen the game named as being inspired by Orcs Must Die, in the name, and also in its VR compatibility. Now the phrase 'TALOS AI' has been dropped into the game, with the result that Talos Principle: VR is definitely part of the Half-Life cycle, but it feels a bit like this is its own game with connections to all

the other Half-Life titles. The standout moments of the demo are seeing Half-Life 2: Episode 2 running on the Vive, and a short scene involving a character featuring a similar handling system, and same protagonist as Alyx, namely Jodie Baxendale, from Lone Echo. In contrast, an earlier sequence involving The Brookhaven Experiment (from the first Half-Life) makes excellent use of the TALOS AI in building swarms, all commanding each other with a simple button press. There are some absolutely stunning vistas to be enjoyed, in particular a first-person overworld scene that moves between paradises, exploring in an early prototype of the game's in-progress world. There are a few other notable moments here too, such as the option to move control to a dedicated GPS pad (something the Rift and Rift S do not offer at the moment), and the brief return of Gravity Gun. Interplanetary Coalition is a classic Half-Life title in VR, pure and simple. That it exists at all is a great thing for anyone interested in a virtual reality Half-Life, so the future looks bright if Talos Principle: VR can hit its quality targets and reward those who have supported it so far. Hopefully, we'll hear more soon about this upcoming release. This invention is directed to depositing plastic material onto a substrate to join the substrate to a carrier material of the plastic material.
