History of AutoCAD AutoCAD has been released at least for the following versions: AutoCAD 2 (1982), AutoCAD 3 (1983), AutoCAD 4 (1985), AutoCAD 5 (1991), AutoCAD LT (1993), AutoCAD 2002 (2002), AutoCAD 2003 (2003), AutoCAD 2004 (2004), AutoCAD LT 2004 (2004), AutoCAD LT 2010 (2010), AutoCAD 2010 (2010), AutoCAD 2011 (2011), AutoCAD 2012 (2012), AutoCAD 2013 (2013), AutoCAD 2014 (2014), AutoCAD LT 2014 (2014), AutoCAD LT 2016 (2016), AutoCAD LT 2017 (2017), AutoCAD LT 2018 (2018), AutoCAD LT 2020 (2020). CAD software started in the late 1970s. In 1978, Computervision introduced its first CAD software product, Model, for the TRS-80. The first widely used CAD application was 3D Studio, a three-dimensional CAD application for the Apple II that was introduced in 1982 and released for the Commodore 64 a year later. In 1983, CA Technologies introduced its own 3D CAD application, Deltascopes, which also ran on the Apple II. In 1984, we saw the first widely used 2D CAD applications on microcomputers: MacCAD 1, developed by a former member of CA Technologies, and SuperCAD, developed by the company of the same name. The introduction of the Macintosh and Windows During the second half of the 1980s, the market for CAD software on microcomputers grew rapidly. Many companies released their own CAD applications for the Apple II, Commodore 64, and Atari 8-bit computers. In 1985, Spectrum Holobyte created a new operating system, "Holobyte Operating System", on which many CAD applications were released. In the same year, QDOS CAD introduced the first CAD application on the IBM PC, which would be known as TurboCAD. This application was a port of the MacCAD 1 software and was quite popular. In 1987, Autodesk was founded as a software subsidiary of Macromedia. Macromedia itself was founded by Web inventor Scott McCloud in 1985. Scott McCloud first started developing applications for the Macintosh in 1985 with an application called WebDoor. In the beginning, WebDoor was a web browser for Mac and it was based on

Novak Djokovic, the

world's top-ranked player, is taking aim at John McEnroe's record as the player with the best winning percentage at a Grand Slam event. With 15 wins and only one loss — at the 2014 French Open when he lost to Frenchman Julien Benneteau — at the Flushing Meadows venue, Djokovic would be up to .941 at the four major tournaments he has played so far. Still, it's one thing for Djokovic to boast about a great Grand Slam showing, another for McEnroe to brag about holding the record. McEnroe broke into the record books in 1983 when he won the Grand Slam title at the French Open and completed his all-time, Grand Slam record with four majors. Since then, McEnroe has been retired from the sport, but is coaching Djokovic this week at the U.S. Open. "No doubt, John has the record," Djokovic said. "It's ca3bf1094

To enter the coding screen just follow these steps : 1. Open the Autocad command bar by clicking the icon 'AUTOCAD' (I believe it's on the top left of the interface, just look for it). 2. Click 'User preferences' and in 'General' tab, enter the number '100' in 'Autocad Designer Number of Open Documents'. 3. Press the 'enter' button and the coding screen should open. Enjoy! :) The New Boss: Startups Have to Learn to Thrive in a Sea of Information Companies that want to hire engineers in the age of the gig economy need to change the way they look for talent, startups can't avoid having to work with incumbent companies and the best future-oriented technologies will likely be accessible through the cloud. These are the conclusions from a panel at the Grace Hopper Celebration of Women in Computing (GHC) 2017 conference in Portland, Oregon. "The gig economy is a big challenge for startups," said John Howley, CEO and co-founder of SnapAPI. "The younger generations are not as easily swayed by corporate loyalties." To prove his point, he recounted an anecdote about how, when his teenage daughter was asked to join a co-op program at school, she laughed, saying, "I'll never be a cog in the machine." "The startup landscape has changed dramatically," Howley said. "While there are opportunities, a lot of it is built on a foundation of the challenges of old businesses." The panelists agreed that they see many opportunities to connect startups and incumbent businesses, even though there will always be some potential for friction. "There's a time for reinvention, but at the same time you have to be aware that it's likely going to take a while for the incumbent to catch up," said Jessica Vall, VP of corporate strategy at Twilio. "The more time and money you spend retooling you're probably going to need to spend more time and money in the future." Finnish startup Alavive, which helps companies improve their employee relations, is connecting startups with existing companies to help make the transition smoother. It is also adding a software development services component that will enable the startups it works with to improve their skills.
