I have a java project in which I used OSGi, but as I would like to start using maven, can someone give a tutorial to how to use maven to use OSGi? A: Most of the answers to this question are many years old and some are not relevant now. To use Maven as a build tool for any OSGi project, start with the maven-osgi-plugin documentation. The latest version is available as a Maven artifact. Next read about the concepts, the capabilities and the use cases of the maven-enforcer-plugin The maven-bundle-plugin is not yet compatible with OSGi but is very simple. For further reference of the OSGi ecosystem you should use the Eclipse WTP. A: To use OSGi with Maven you need to install the Maven Fuse plugin. Maven Fuse is an Eclipse plugin that provides a unified view of your projects. Here's how you install it on your Eclipse workspace: Once you have Maven Fuse installed, you can view your OSGi projects in a unified window: Q: How to get data from an array of objects via an index? I'm trying to write a method that will take an array of objects (things) and a variable index, and then return one object from the array based on the variable index. For example: const things = [{name:'something', age: 12}, {name:'something', age: 15}] function getRandomObject(things, index) { const randomThing = things[Math.floor(Math.random() 6d1f23a050
